

What is S⁴-as-a-Service?

S⁴-as-a-Service offers our customers the flexibility and agility required to more efficiently operate SAP – *without the capital expense and IT resources associated with an in-house solution.* Let us take on the administrative burden of architecting, managing, and supporting your SAP environment, and allow you to do what you do best – *manage your business.*

Get SAP software without the typical drawbacks

Why S⁴aaS?

Congratulations! You have joined the market leaders in business application software by choosing SAP to run your core business processes. As you probably know, over 80% of the world's leading Fortune 500 companies have come to trust and rely on their SAP systems.

At just \$195/user/month, you can transition to our innovative S⁴aaS solution and continue to benefit from all of the core functionality that SAP software has to offer. That is literally less than the cost of purchasing a Chipotle steak burrito every night for dinner!

How do we do it?

For the past 18 years, we have become very skilled at making SAP software work for mid-sized businesses in resource-constrained environments. If S⁴aaS is deemed the right fit for your company, we will continue to manage your SAP system for you in a safe and secure cloud environment.

Contrary to popular belief, SAP software does not necessarily need an army to keep it going. With our S⁴aaS offering, we will host and manage the environment for you. All you will need to provide is a web browser, and we can transition your existing SAP system to S⁴aaS.

The bottom line is that we want to see our customers be successful, and we don't consider ourselves successful until we can make that happen.

The **Savantis Group** makes the world's best business software affordable for mid-sized businesses, by successfully implementing it in weeks, not months or years.

In addition to complete ERP and CRM implementation services, we also offer a transactional content & document management solution, mobile apps, hosting, and other services (such as training, staffing, and technical support). In short, we are your one-stop-shop for all your SAP needs, and we'll be here to help you every step of the way.

Our Mission is to make the most scalable, functional, and market-leading business software in the world affordable, enabling mid-sized businesses to effectively compete with anybody.

How will S⁴aaS enhance my business?

Running a growing and evolving business is complicated enough without having to worry about managing your multifaceted infrastructure as well. Simplify your life, and allow us to take away the day-to-day operational burden from your laundry list of responsibilities.

Solution Stack	On-Premise Solution	S ⁴ aaS
User Support	Customer Manages	Savantis Manages <i>(We can manage as much or as little as you like.)</i>
Applications		
Data		
Runtime		
Middleware		
Database		
Operating System		
Virtualization		
Servers		
Storage		
Networking		

How affordable is it?

The table below provides a case study scenario of the costs of managing your own infrastructure, compared to the lower and more affordable cost of allowing us to do it for you in a safe and secure cloud environment. As you can see, not only is S⁴aaS a more affordable option, but we will manage all of the complexities of your SAP environment on your behalf.

Operating Costs:	In-House Costs (hosting 50 users)	Cost of S ⁴ aaS (for 50 users)
Software and hardware procurement	\$ 140,000 / year (1 time fee)	Included with subscription.
Data center space, power, cooling, etc.	\$ 70,000 / year	Included with subscription.
Admin. team (SAP BASIS and IT admin.)	\$ 200,000 / year	Included with subscription.
24/7 Help Desk and application monitoring	\$ 220,000 / year (3 shifts)	Included with subscription.
IT maintenance	\$ 75,000 / year	\$ 117,000 / year
TCO – Year #1	\$ 705,000 / year	\$ 117,000 / year
TCO – 3 Year Contract	\$ 1,835,000	\$ 351,000

How Can I Get It?
