

Savantis Group

is an SAP Solutions Provider focused on ensuring our customers (mid-sized companies) use the tools available to large companies to become large companies.

Our Mission is to become true partners with our customers and team members, being focused on the same objectives that they are focused on - efficiency and competitiveness.

No matter where you are in the SAP lifecycle, we can offer you value-added capabilities.

RentON™ by Savantis Group

The Future of the Rental Market

Reduce wait time and improve overall customer experience! That is what is possible with the Savantis RentON Solution. Our customers have adopted this innovative solution that enables them to rent out all types of products and equipment like skis, scuba gear, medical equipment and more. With RentON, they have been able to empower their customers and team with the knowledge to provide service quickly and efficiently. You can too. "Get in the know" and get Savantis Group's RentON Solution offering!

Savantis RentON Solution automates rental and leasing processes for customers. RentON has the features and functions to efficiently plan, execute, and deliver to the rental needs of your customers. It is equipped with customizable web and mobile applications, allowing the system to cater to the needs of the marketplace.

RentON in your store

Imagine your customer registering on-line, scheduling their visit to collect the item and when they get there, it is all ready for your customer to pick up. Imagine being able to know what the demand is at any time and to allocate the right inventory to the right location, ahead of time. With Savantis RentON Solution you can achieve all this!

RentON is configurable to allow you to rent out everything from shoes to bulldozers and will allow for special data capture options to be designed for your specific needs. The solution does not stop at renting out the equipment, it also supports the post-rental service and maintenance, ensuring that your inventory is available and safe. Full history reporting facilitates the drill down for costs and improved processing. Since this solution is embedded in your ERP system, it is fully integrated with your financial, logistics and customer data. The UI is flexible, and designed to be ergonomically efficient.
