

Savantis Group

is an SAP Solutions Provider focused on ensuring our customers (mid-sized companies) use the tools available to large companies to become large companies.

Our Mission is to become true partners with our customers and team members, being focused on the same objectives that they are focused on - efficiency and competitiveness.

No matter where you are in the SAP lifecycle, we can offer you value-added capabilities.

SAP HANA Implementation Solutions by Savantis Group

Instantly access and analyze transactional and analytical data. Dramatically improve your planning, forecasting, trend analysis and financial close processes while reducing TCO with less hardware, maintenance and testing. Explore and analyze vast quantities of data from virtually any data source - at the speed of thought. In-memory computing has arrived at SAP and will be transformative for many of its customers.

The technology is there, to make it work optimal for your business scenarios, you need a solutions provider with an experienced team of SAP HANA subject-matter experts. Consultants with hands-on SAP HANA project implementation experience at customers such as Apple and Colgate Palmolive.

Savantis Group provides turnkey SAP HANA implementation solutions, including methodology and project management capabilities.

We have a
Service for that:

DELIVER – Value

SAP Implementation with complete solution offerings in the areas of SAP for Retail and Wholesale, HANA, Mobility, Netweaver Identity Management, Rental and other point solutions

ENABLE – Capability

Capability Design & Build, Training & Education

SUPPORT – Embedded

through SAP's world-class AMS, hosting and functional support models

Plan and Prepare

You're ready to make better decisions faster with SAP HANA but need advice on how to set-up and get started. Savantis Group will:

- Identify best 'use case' scenarios of SAP HANA for your business
- Guide you through the Appliance purchase (hardware + software) most optimal to your current IT landscape
- Advice on sizing and data replication options management services
- Project plan preparation and project management services

Implement

You are getting ready to implement real-time data analysis or test-drive a HANA POC. Engage Savantis Group to:

- Install and configure your SAP HANA landscape
- Install, Upgrade and Configure SAP BW 7.3 with SAP HANA as the foundation system
- Extract source data and provide data loading services to SAP HANA
- Advice on and implement data replication options
- SAP HANA Data Modeling services (HANA Studio)
- Integrate your SAP HANA landscape with your source system landscape
- Implement SAP HANA reporting capabilities
- Establish security services/framework around SAP HANA
- OS/DB migration implementation services related to HANA

Accelerate

You are up and running on SAP HANA and are looking to further enhance your landscape. Our expert team helps you:

- Upgrade SAP HANA components
- Provide SAP HANA administration, monitoring and support services
- SAP HANA tuning
- Maintenance and configuration of SAP Portal and/or SAP BW systems related to your SAP HANA landscape

Educate

Establish self-sufficiency on SAP HANA. Savantis Group's experienced trainers provide on-site SAP HANA education sessions to train your team (including SAP HANA administration).
