- **Enable** - maximizing the value of our customers SAP investment through SAP Training and Education, Capability Design & Build and Resourcing services
- **Support** - providing tailored SAP Support, Enhancements, Optimization and Educational services post go-live

## SAP NetWeaver Identity Management (SAP IdM) Implementation Solutions

Managing users in heterogeneous IT landscapes presents many challenges for organizations. System landscapes are more complex than ever, and user tasks and responsibilities are constantly evolving. This complexity is compounded by regulatory requirements mandating that organizations track who had access to which applications at what time. With the SAP NetWeaver® Identity Management component, you can integrate identity management with the business processes within and beyond your enterprise, using identity federation to facilitate joint authentication and single sign-on solutions for a secure identity management solution across company.

Powerful and innovative – and yet scalable and flexible – SAP NetWeaver ID Management aids you in establishing a framework for comprehensive and compliant identity management. The component is finely tuned for integration with the SAP BusinessObjects™ Access Control application, a market leader for governance, risk, and compliance (GRC) in SAP software systems. By combining SAP NetWeaver ID Management with this application, you can be even more efficient in helping ensure universal security. The time is right to secure your user administration for years to come. Join the many SAP customers already taking full advantage of the new developments and enhanced functions in SAP NetWeaver ID Management.

### Plan and Prepare

You're ready to have a compliant central identity management environment with SAP IdM but need advice on how to set-up and get started.

Savantis Group will:

- Identify best 'use case' scenarios of SAP IdM for your business
- Select your hardware, and advice on sizing and data replication options
- Project plan preparation and project management services and money.

## Compliant Identity Management

**SAP NetWeaver®  
Identity Management**

**Provides reduced  
total cost of ownership  
and increased security**

**SAP BusinessObjects®  
Access Control Application**

**Helps ensure that IT  
business application  
controls are compliant**

- *Provides compliant identity management across SAP software and heterogeneous landscapes in one integrated solution*
- *Provides standards based integration to create tightly aligned loosely coupled solutions from complimentary components.*
- *Gives a consistent view of current and historic access rights approvals and policy violations*

## Implement

You are getting ready to implement SAP IdM or test-drive SAP IdM POC. Engage Savantis Group to:

- Install and configure your SAP IdM landscape
- Replace your CUA with SAP IdM
- Integrate SAP IdM with your SAP HCM (HR) and SAP Access Control (GRC) systems to automate the Identity Lifecycle and establish Segregation of Duty policies
- Integrate SAP IdM with SAP GRC, Lotus Notes, MS Exchange and MS Active Directory
- Have one central place to manage users in SAP and non-SAP applications regardless of the individual data stores (for example, changing a phone number or e-mail address automatically updates all relevant systems)
- Have a centralized reporting functionality to address the pressing need for compliance and auditability using the SAP NetWeaver Business Warehouse component, mapping of one user to identities in all systems, and fully auditable user access across the entire IT landscape
- Have password-reset and lost-password management functionality for end users, alleviating help-desk workload and reducing operational costs
- Built-in identity federation functionality for cross-company identity management scenarios and single sign-on
- Integrate with SAP NetWeaver Single Sign-On software to support end-to-end single sign-on and encryption in distributed environments, including all SAP graphical user interfaces (GUIs) as well as Web-based front ends

## Accelerate

You are up and running on SAP IdM and are looking to further enhance your landscape. Our expert team helps you:

- ✓ Upgrade SAP IdM components
- ✓ Provide SAP IdM administration, monitoring and support service
- ✓ SAP HANA tuning
- ✓ Maintenance and configuration of SAP Portal and/or SAP BW systems related to your SAP IdM landscape

## SAP NetWeaver® Identity Management

**Password  
Management**

**Roles and  
Entitlements**

**Reporting  
and Auditing**

**Provisioning, Workflow  
and Approvals**

**Identity  
Virtualization**

**Data  
synchronization**

## Educate

Establish self-sufficiency on SAP IdM. Savantis Group's experienced trainers provide on-site SAP IdM education sessions to train your team (including SAP IdM administration).
